## • OBJECTIVES

---

A Frontend Developer specializing in building interactive user interfaces using React and JavaScript, with experience in developing fast, responsive pages and delivering high-quality user experiences. Passionate about continuous learning and collaborating within teams to build high-quality products.

## • EXPERIENCE

---

### Frontend Developer – Wego Station (full time – on site)

Mar 2025 – Present

- Optimized performance and enhanced user experience, achieving noticeable improvements across the platform.
- Built reusable and scalable UI components to maintain consistency and improve development efficiency.
- Collaborated closely with backend teams to integrate APIs and ensure seamless data communication.
- Wrote clean, maintainable, and well-structured code following best practices and modern development standards.

## • PROJECTS

---

### TicketTours – Tourism & Booking Platform

live:<https://tickethub-tours.com/>

- Developed key pages for exploring and booking travel packages.
- Implemented interactive UI elements and responsive layouts.
- Integrated API data and optimized loading performance.

### 15May Club – Admin Dashboard

live:<https://15may.club/>

- Built an intuitive admin panel for managing content and users.
- Designed organized layouts that improve workflow and navigation.
- Developed dynamic pages and interactive features using React.

### Food2go – Landing Page

live:<https://food2go.online/>

- Developed a modern and responsive landing page for a company offering a Restaurant Management System.
- Designed a clean, professional layout using React and Tailwind CSS, ensuring smooth navigation and strong visual hierarchy.
- Optimized page performance and ensured cross-device compatibility for a seamless browsing experience.
