• OBJECTIVES

A Frontend Developer specializing in building interactive user interfaces using React and JavaScript, with experience in developing fast, responsive pages and delivering high-quality user experiences. Passionate about continuous learning and collaborating within teams to build high-quality products.

• EXPERIENCE

Frontend Developer – Wego Station (full time – on site)

Mar 2025 – 2026 May

- Optimized performance and enhanced user experience, achieving noticeable improvements across the platform.
- Built reusable and scalable UI components to maintain consistency and improve development efficiency.
- Collaborated closely with backend teams to integrate APIs and ensure seamless data communication.
- Wrote clean, maintainable, and well-structured code following best practices and modern development standards.

• PROJECTS

AlnaTech – E-Commerce Platform & Admin Dashboard

live: <https://alnattech.de/en>

- Developed a full-featured e-commerce platform with a modern and responsive shopping experience.
- Built dynamic product catalog pages, category management, product details, and streamlined purchasing workflows.

Mazoom Invitations – Event & Invitation Management Platform

live: <https://www.mazoominvitations.com/>

- Developed and integrated a comprehensive admin dashboard to manage events, invitations, guest lists, and real-time operations.
- Focused on scalable architecture supporting large guest lists and multi-event management for organizers and businesses.

OrderFood – Food Ordering Platform

live: orderfood.keeto.org

- Built responsive interfaces for displaying restaurants, menus, categories, and prices.
- Implemented dynamic pages for restaurant management and food item browsing.
